FUNDAMENTAL WOODWORKING – This class will help you advance your woodworking skills by leaps and bounds and would be perfect for beginners as well as intermediates. Marc will cover several elements of woodworking including design, wood movement, joinery techniques, working with veneer and finishing. There will be demonstrations on truing boards, sharpening common edge tools, cutting several types of joints, including dovetails, inlaying techniques, cutting simple veneer patterns, gluing techniques and understanding which finishes work best for the results you desire. By the end of the class, you will be on your way to a better understanding of fine woodworking craftsmanship.

JOINERY – Marc has had over 1500 people travel from around the world to attend his weeklong joinery class at his school. He has decided to come and spend a day showing some of his favorite joints. The day will start with a quick review of sharpening scrapers and chisels to razor edges. He will then discuss how to select a joint based on strength, grain direction, movement, and quality of fit. Demonstrations will include how to hand cut dovetails both through and half-blind, mortise and tenons and the strongest joint in woodworking, the hip joint.

Classes will be held at the: **Davidsonville United Methodist Church 819 W. Central Ave., Davidsonville, MD. 21035**
